Travel and Tour

Tech stack- HTML,CSS,Javascript,React

Description

The project is a Travel and Tour Booking Website built with React.js. It provides users with an interactive platform to explore tour packages, view details, and make bookings. The site features a modern UI, dynamic routing, and data management with JSON/LocalStorage, making it both functional and user-friendly.

Highlights

- Attractive and responsive travel-themed UI
- Tour listings with images, prices, and descriptions
- Detailed tour pages with booking option
- Search and filter functionality for packages
- Booking form with validation
- Data stored and managed using JSON/LocalStorage/JSON Server
- Navigation with React Router
